

Sweets Mood

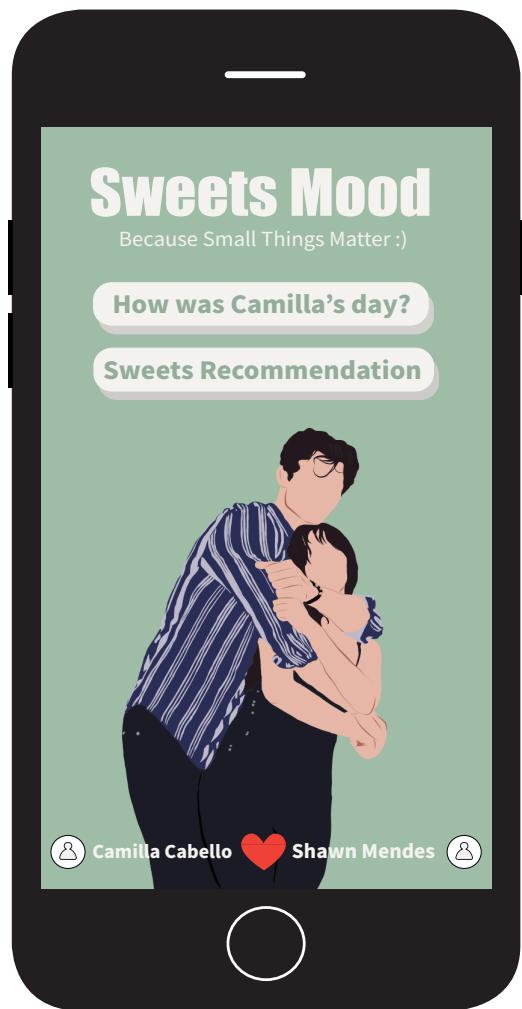

An application for couples that care for how their partner feels through the day. This recommends sweets depending on it and suggests a few options to help you actually bring them to your lover.

Be the sweetener to your partner's long day !

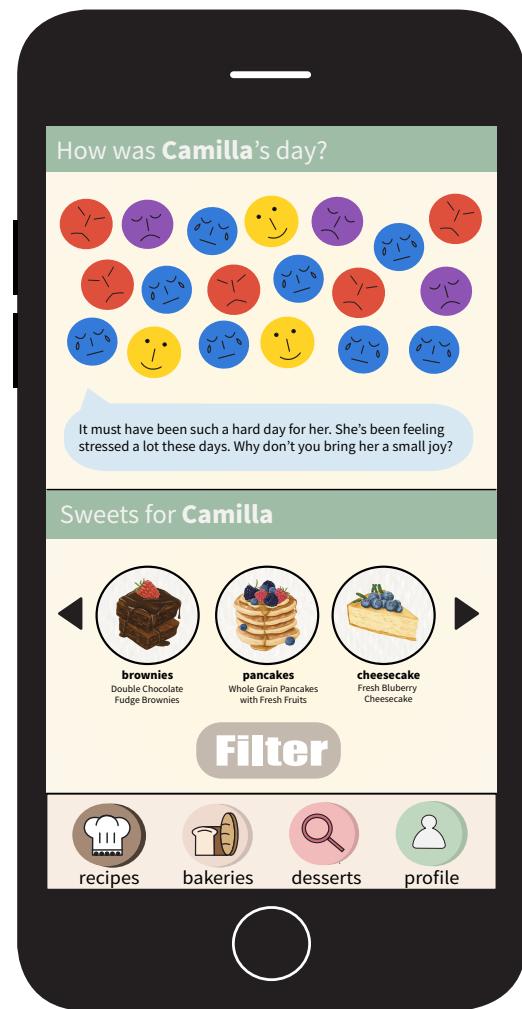

Sweets Mood allows lovers to see the feelings of their partner with different mood bubbles, based on which this will present nice desserts that can be filtered by conditions like gluten-free and vegan.

Couples can select their picture as a wallpapaer and they can create their own profile to see their names and profile pictures on the app.

Besides, this app provieds information on recipes, nearby bakeries, and also generally desserts. Small things, that's all that matters!
